# IP paging adapter and scheduler for legacy communications systems

Connect the Algo 8305 Multi-Interface IP Paging Adapter to a telephone port (FXS) on a legacy communication system to bridge analog paging systems and IP environments.

#### **INTEGRATE LEGACY WITH MODERN PAGING SYSTEMS**

The 8305 has three key connection points: a telephone port that emulates an analog telephone, an 8  $\Omega$  output that can connect to self-amplified speakers, and a line output. As a SIP-compliant device, the 8305 makes it possible connect existing legacy paging systems to VoIP or UCaaS platforms. The 8305 is also multicast capable enabling legacy systems to be used alongside IP devices.

## **SCHEDULE AND AUTOMATE**

Using the web interface, you can schedule announcements to play automatically. Set up is easy no matter if you want to schedule single or multiple events such as bells, safety reminders, or holiday announcements. Additionally, emergency alerts can be activated by dialing a set extension or via a device, like a button, connected to the relay input to provide contact closure.

#### **SCALE WITH EASE**

The 8305 is a PoE device that uses SIP, multicast, APIs, and smart relays to connect diverse paging systems, services, and devices. This gives you further control of how your communication system operates and simplifies the process of growing your paging system alongside facility upgrades.

#### **KEY FEATURES**

- SIP-compliant, PoE
- Secure SIP using TLS and SRTP
- Multicast capable
- Telephone port that emulates an analog telephone (connects to an FXS port on a legacy amplifier)
- 8 Ω output port (connect to self-amplified speakers)
- Schedule bells, tones, and automated announcements
- Wideband HD audio (G.722 voice codec) for high intelligibility speech
- Configure up to 50 page zones

# 8305 MULTI-INTERFACE IP PAGING ADAPTER

| INPUT/OUTPUT   |   |  |
|--|---|--|
| TELEPHONE PORT   | Emulates an analog phone. Capable of ring detection and on-hook/off-hook  |  |
| 8 Ω OUTPUT   | Balanced and isolated wire pair output to external selfamplified speakers. Load impedance of 2 k $\Omega$ down to 8 $\Omega^*$ . Ma output of +3 dBm @ 8 $\Omega$ , +1.5 dB higher at 2 k $\Omega$  |  |
|  | *Intended use is nominal 2 k $\Omega$ or 1 k $\Omega$ self-amplified speakers connected in parallel to a total minimum resistance of 8 $\Omega$   |  |
| LINE OUT   | Balanced and isolated wire pair output to external amplifier.  Output level defined using web interface. Polarity independe   |  |
| RELAY INPUT  | Normally open or normally closed dry contact with supervisio<br>Compatible with Algo 1202 Call Button, 1203 Call Switch, 1204<br>Volume Control or EOL resistor termination.  |  |
| RELAY OUTPUT   | Max 30 V 50 mA (normally open)  |  |
| AUX OUT  | 3.5 mm jack for analog line level input for compatible PC speakers or headset. Non isolated.  |  |
| POWER  |   |  |
| POWER SOURCE   | PoE (IEEE 802.3af Class 0) 48 V, 15.4 W   |  |
| MAX POWER (AT DEVICE)  | 4 W   |  |
| IDLE POWER   | 2 W   |  |
| SIP  |   |  |
| SIP EXTENSIONS   | <ul><li>50 Page</li><li>10 Emergency Alert</li><li>10 Ring</li></ul>  |  |
| SIP SIGNALLING/<br>TRANSPORT PROTOCOLS   | UDP, TCP, RTP   |  |
